

Presenter remote control

*Run the demo in manual mode — the screen waits for an explicit **N** before advancing.* Auto mode plays unattended at the active warp factor; never use it live.

ENTER PRESENTER MODE

1. Open <https://demo.orbitrallab.com/rundemo> 2. Press **?** to open the presenter chrome 3. (No PIN — root token gate at the entry page is the only auth layer) 4. Toggle **Manual mode** → **on** 5. Pick a scenario in the chrome → click ▶

HOTKEYS

KEY	ACTION
N	Advance to the next screen
Shift+N	Go back one screen — recover from over-advance
Shift+B	Jump to the start of the current act
?	Open / close the presenter chrome
Esc	Close the chrome / dismiss modals
Enter	Submit forms (no PIN — chrome opens directly)
Space	Reserved — browser scroll, not used by the demo

SCENARIOS

SCENARIO	PICK IN CHROME	APPROX RUNTIME (MANUAL)
T1 — Onboarding	"T1" · 25 screens + Bridge A	~12 min
T2 — Repeat trade (FAB)	"T2" · 17 screens + Bridge B	~10 min
T3 — Reverse corridor (Itaú)	"T3" · 18 screens	~10 min
Act 6 — Final Reveal	"Act 6" · 1 screen	~3 min

Each scenario stands alone. Act 6 is the universal closer — designed to follow T3 for the full reputation-arc crescendo, but works after any scenario.
